Sharon – Can you see the file room’s email to me below about the Frost St’s 104e response. They need a password to retrieve some of the info from an excel sheet. I don’t believe we’ve been given a password so maybe we just supply what we’ve been given as is? Let me know your thoughts.

Jennifer,

I have another question it’s from the flash drive. Attachment 9 is an excel spreadsheet which is locked work sheet meaning I can’t make any changes to the cells or rows to organize it before I convert it to pdf. I wasn’t even able to convert to pdf I had to export the document to pdf. I attached the original excel spread sheet of attachment 9 from #6 Next Millenium Realty, LLC the list of responses and the pdf after I exported from the excel spread sheet.

On the spreadsheet few of the columns the information was not wrapped so some of the information is hidden within the cell. The pdf after exporting looks like the spreadsheet without grids and some hidden information and without a border. I tried to click unprotect it which I need a password to do so.

Can you contact the PRP or their law firm to send a password or can they send a pdf of attachment 9 instead of the excel spreadsheet?

Thank you

Oh Ok, didn’t realize they were instructional. Yeah, we can exclude them.
Thanks for sending them

Jennifer,

I attached the 2 pdfs of the flash drive from the SanDiskSecureAccess folder if you need to review it. I am going to add it to the end of their response.

Ok, we might as well just provide those 2 documents as well since it does fit in the category of what was provided to us in response to their 104e.

Julie –

ED_001164_00019847-00003

Question #1: Yeah, it appears it was a mistake to include the grayed out information in the EPA folder. It looks like the grayed out files are duplicates of files that are actually available. So just copy the available pdfs from that file. Also, could you take a screenshot of what is in the Sandisk Secure Access folder? I don't recall if it is responsive and just want to make sure.

Question #2 : Yeah, that's fine to only work off one of the discs.

Hi Jennifer,

I have 2 questions about the documents you had dropped off yesterday.

Question #1:

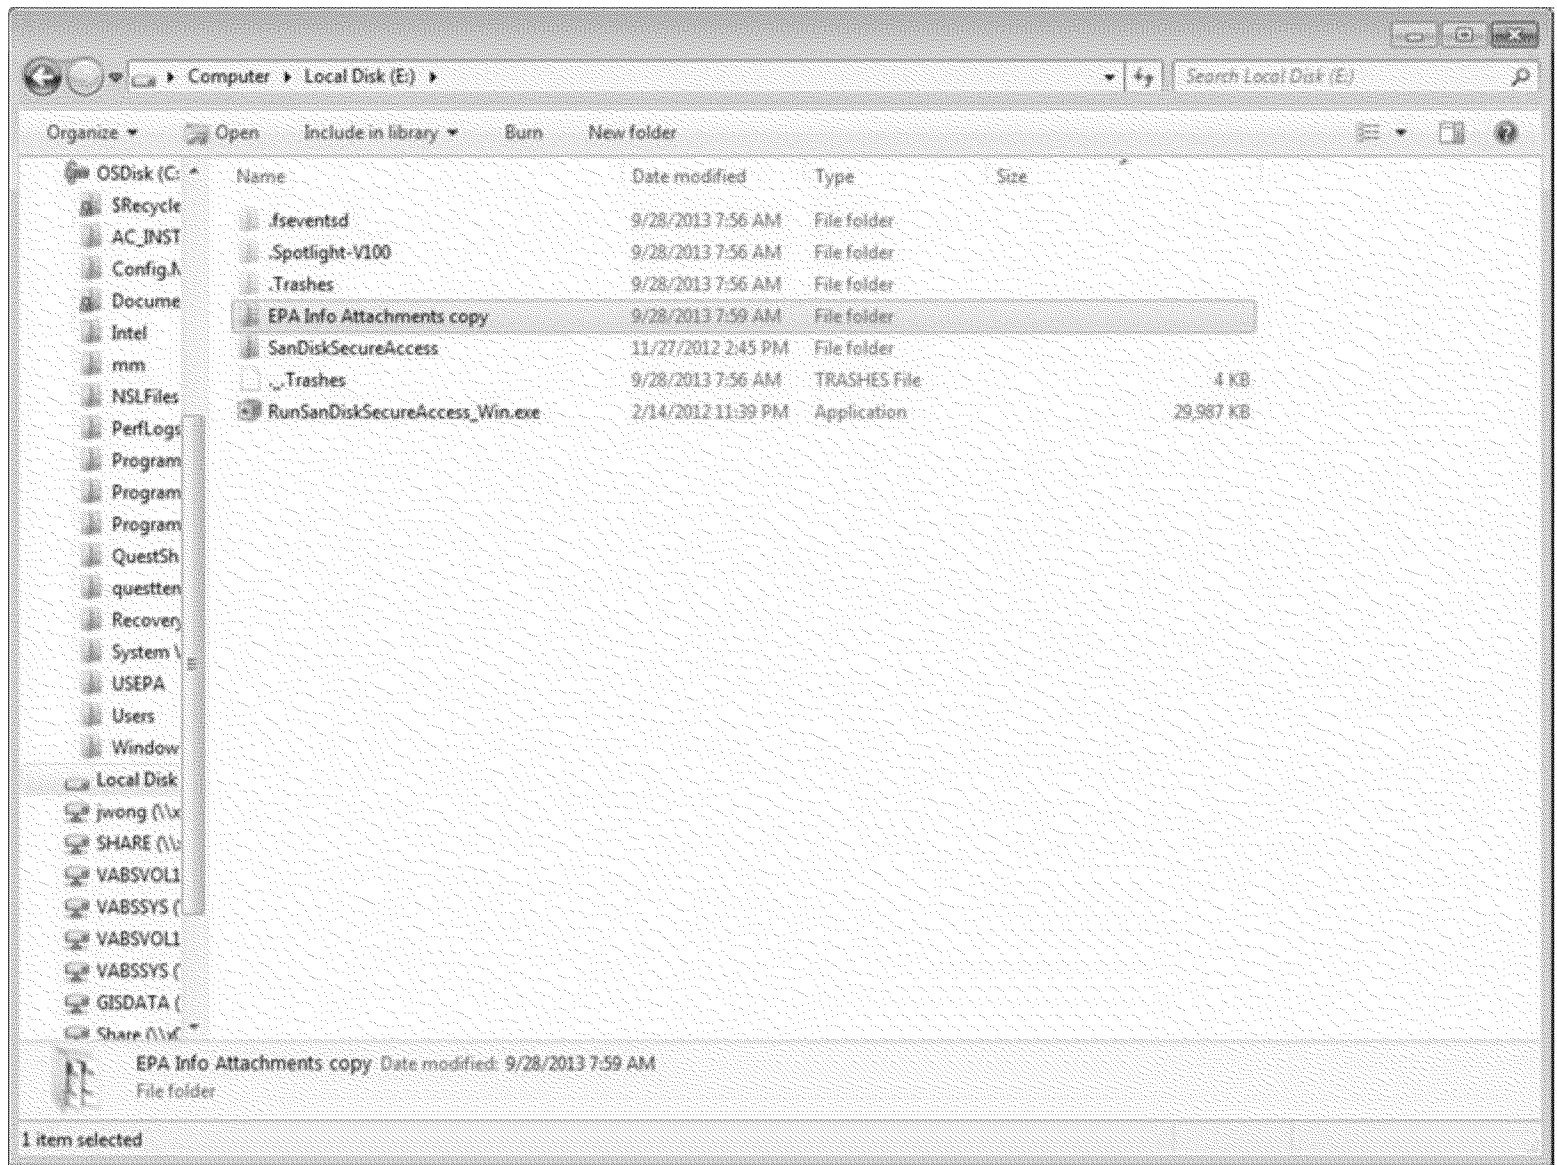

For PRP#6 on the list the response with the flash drive: **1st screen shot:** The only folder I think I should be using is EPA Info Attachments copy, would this be correct? I'm not sure what the first 3 folders are when I try to open them I am not able to open. I'm not sure if the law firm included more information than they realized.

Then after I open the EPA Info Attachments copy folder I get 2 sets of the same title documents, 1 set is greyed out and the other set I am able to open. Look at 2nd Screen shots. I tried to open up the grey out documents but I keep getting an error message look at the 3rd screen shot. I am assume it was a mistake they included the grey out information. If not let me know.

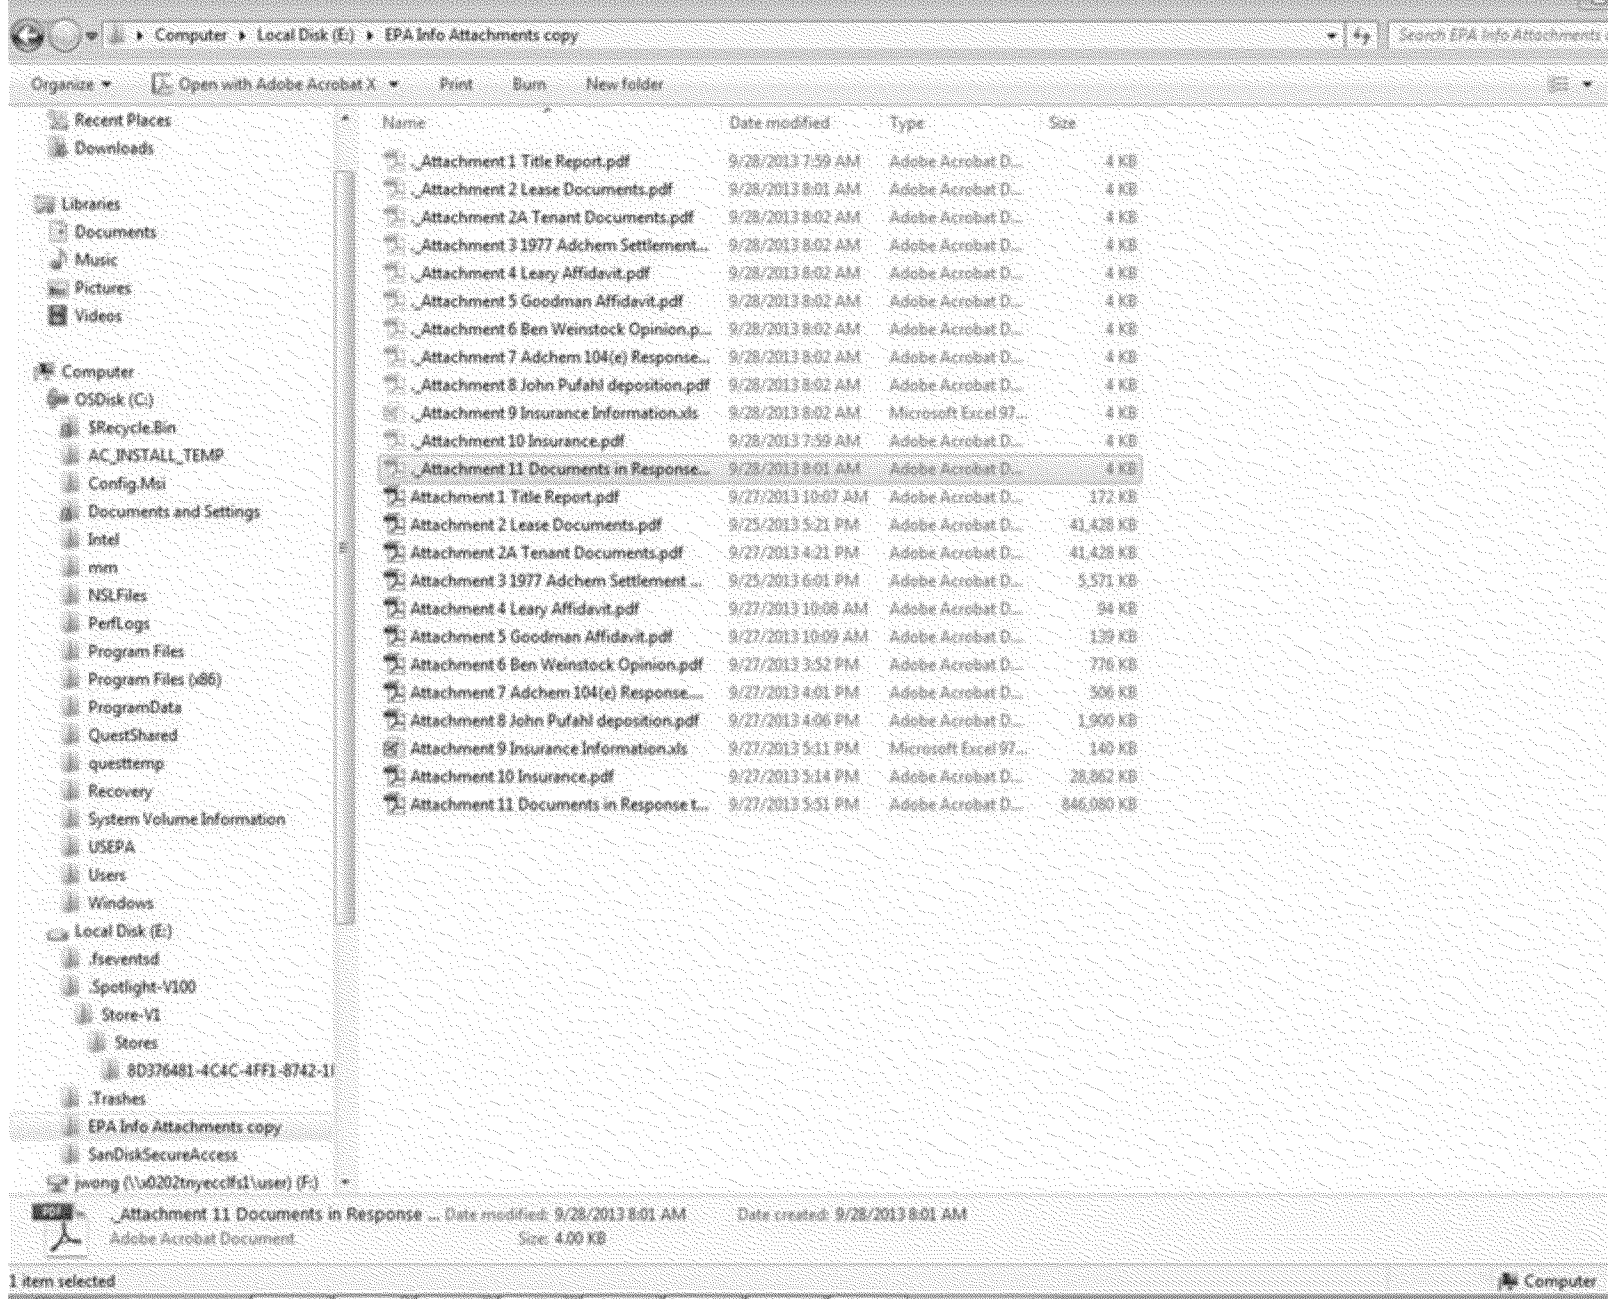

Question #2:

DOE folder the 2 disk are identical except for the date on the disk label by one day off. Please see the attached **pdf**. Should I only work on 1 disk?
